REMARKS

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

The present application is a continuation-in-part of co-pending U.S. Application No. 09/387,546, filed August 31, 1999 and U.S. Application No. 09/425,816, filed October 22, 1999, each of which is assigned to Motorola, Inc. These brief remarks are provided for the assistance of the Examiner to identify how the claims of the present application relate to those of the parent applications.

The present application includes 18 claims, including 4 independent claims (1, 10, 11 and 12). Generally, claims 1-11 are directed to subject matter of parent 09/425,816; claims 12-18 are directed to subject matter of parent 09/387,546.

Among the independent claims, claims 1, 10 and 11 correspond to former claims 9, 8 and 16 of the parent 09/425,816 application, except claims 1 and 11 have been amended to recite the

phrase “including a target destination identifier” (describing the target destination field that is sent to the key delivery device, or KVL, prior to the KVL delivering key management messages, or KMMs, to the targets). The significance of the target destination field (and the target destination identifier) is that, upon a key delivery device receiving the KMM frame with the target destination field and identifier, it is assured of delivering the right keys to the right target. Claims 1 and 11 are believed to overcome the basis of rejection applied against parent claims 9 and 16 based in part on Steinbrenner (U.S. Patent No. 5,093,860) because, to the extent a KVL of the Steinbrenner patent stored indicia of target devices, such indicia was retrieved by the KVL after delivering KMMs to the targets. Consequently, the KVL of the Steinbrenner patent was not necessarily assured of delivering the right keys to the right targets.

Claim 12 corresponds roughly to former claim 1 of the parent 09/387,546 application except has been amended to remove the limitation *storing a record identifying target encryption devices* in favor of *receiving one or more key management messages* including “indicia of target devices.” Claim 12 thus recite steps relating to a KVL determining target devices from some indicia of target devices received prior to delivering KMMs to the target and hence, enable the right keys to be delivered to the right targets.

Respectfully submitted,

By Steven R. Santema
